Re: **AS STATED**

The Woodhull Hospital Human Research Committee has approved the Magico-Religious and Ethnomedical Mercury Exposure Study effective 11/1/99.

As Principal Investigator you are responsible for informing the committee of the status of the project. No changes, amendments, or addenda may be made to the protocol or the consent form without committee re-review and approval. If adverse consequences or unexpected side effects are encountered in the course of the study, or if new information becomes available which could change the perception of a favorable risk: benefit ratio, you are responsible for informing the committee promptly. The committee must review the new information to determine if the protocol should be modified, discontinued, or should continue as originally approved.

Approval is valid for one year. Renewal should be requested at least one month before approval expires.
